Overview

This course has been designed to facilitate analytical assessment of financial statements. Aim of the course is to highlight various aspects of financial statements which have to be taken in to consideration while analyzing numbers. This course has been segmented into three broad categories in order to cover various aspects of financial analysis. Interpretations of ratios are always interrelated, therefore, appropriate dissection of the ratios is very important which can be helpful in due diligence, performance analysis, credit base analysis, investors analysis, assessment of future outlook, cash cycle assessment in consideration to budgetary forecast, etc. Through this course, assessment of various aspects of financial analysis will be facilitated against small amount of investment.

Key Features

- o Importance of cash flow cycle
- o Budgetary planning
- o Strategic financial decisions
- o Identification of areas for the improvement
- o Performance review
- o Forecasting tool
- o Competitive analysis on the basis of sector base performance

Learning Outcomes

- o Develop skills to capitalize financial analytical tools
- o Dissection of financial ratios
- o Assessment of areas for performance appraisal
